**SIMPLE APPLICATION THAT DISSOLVES BLACKHEADS**

No more squeezing and pinching to get rid of those unsightly blackheads. Just dip a single, soft, and are wet, to get them out and then to dissolve them. To do this just get about two ounces of calomile powder from your druggist and mix it with a few drops of sponge—rub firmly over the blackheads for a few seconds—wash the parts and dry them off.

Pincing and squeezing not blackheads make large pores and you cannot get all of the blackheads out. This way with this simple application of calomile powder and water dissolves every pore of them and leaves the skin and pores in their natural condition. It is a drugstore powder, the calomile powder and about two ounces will be all you will ever need.—Advertisement
